NOT CONVERGENCE!!!

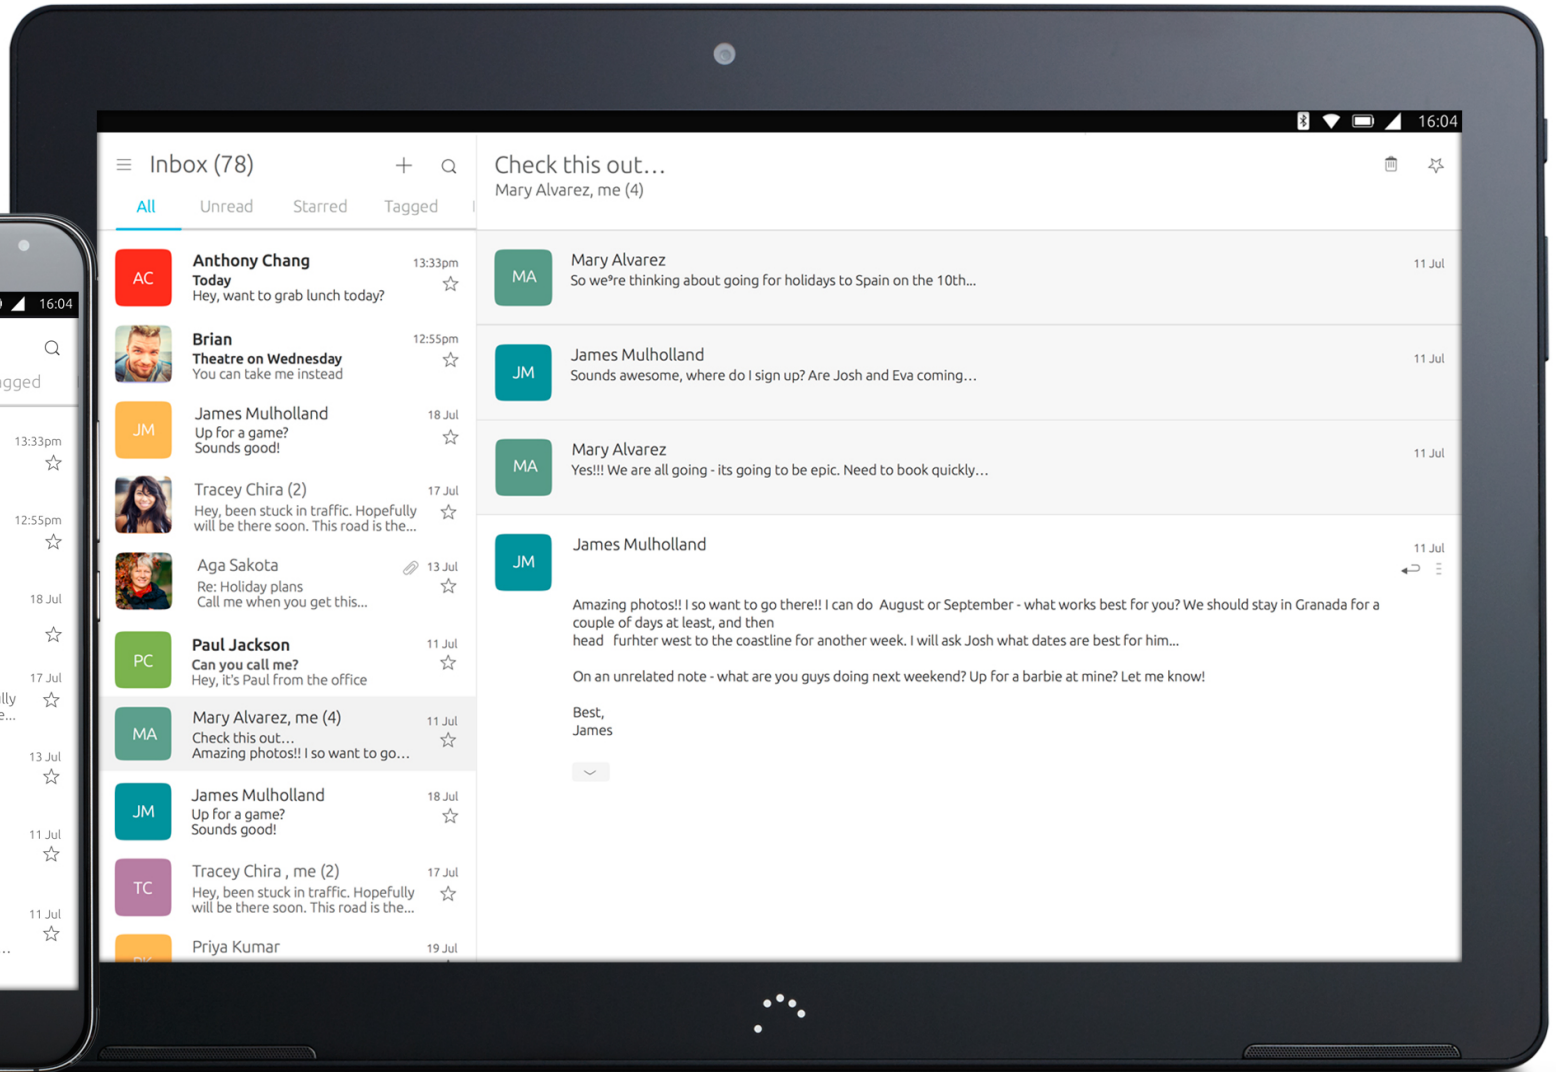

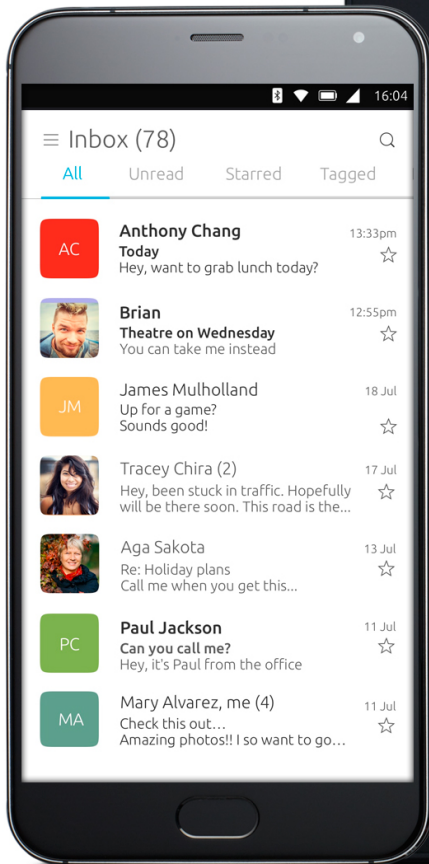

Pointing Device

To make a PC-like experience on a phone

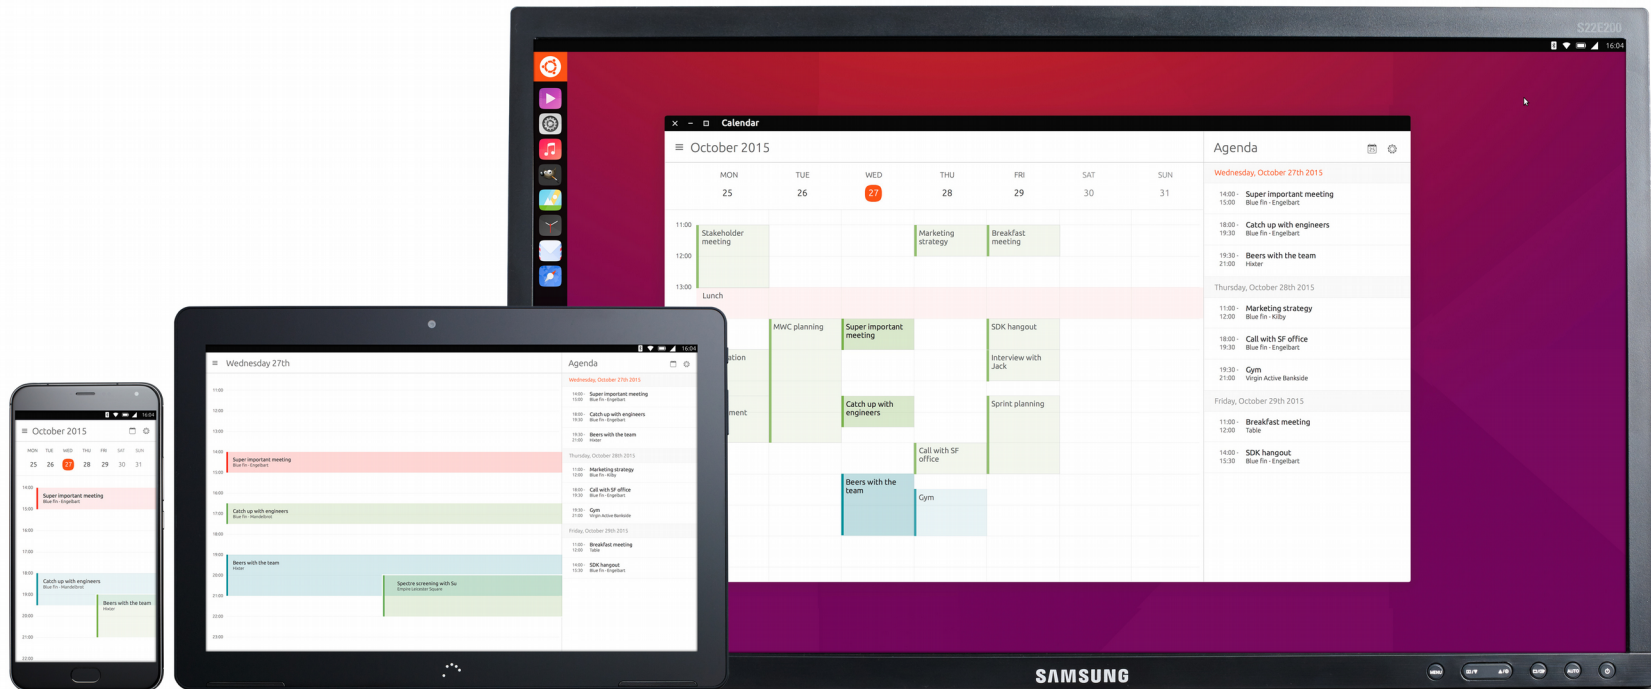

- Effortless multitasking and window management
- Full range of desktop applications and thin client support for mobility and productivity
- Integrated services with desktop notifications
- Ability to manage applications and easily organise favoured ones for fast access
- Simple file browsing, file and folder creation and management
- Comprehensive system control and access to the underlying OS if required
- Single application store with a range of compatible 3rd party services
- Communication from the desktop interface using the phone's telephony and messaging applications
- *Responsive applications developed for both touch and point/click input and which re-shape to whichever UI is being displayed*

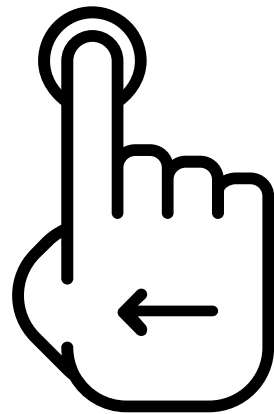

AdaptivePageLayout — The component provides a flexible way of viewing a stack of pages in one or more columns. Unlike in PageStack, there can be more than one Page active at a time, depending on the number of the columns in the view.

<https://developer.ubuntu.com/api/apps/qml/current/Ubuntu.Components.AdaptivePageLayout/>

Applications that don't adapt for touch and mobile usage in the next 5 years will no longer be user's defaults

Swipe left to uninstall

Applications that are single function won't be worth the download time

“ Ubuntu Core provides transactional updates with rigorous application isolation. This is the smallest, safest Ubuntu ever, on devices and on the cloud. We’re excited to unleash a new wave of developer innovation with snappy Ubuntu Core! ”

Mark Shuttleworth, founder of Ubuntu and Canonical.

What is a snap?

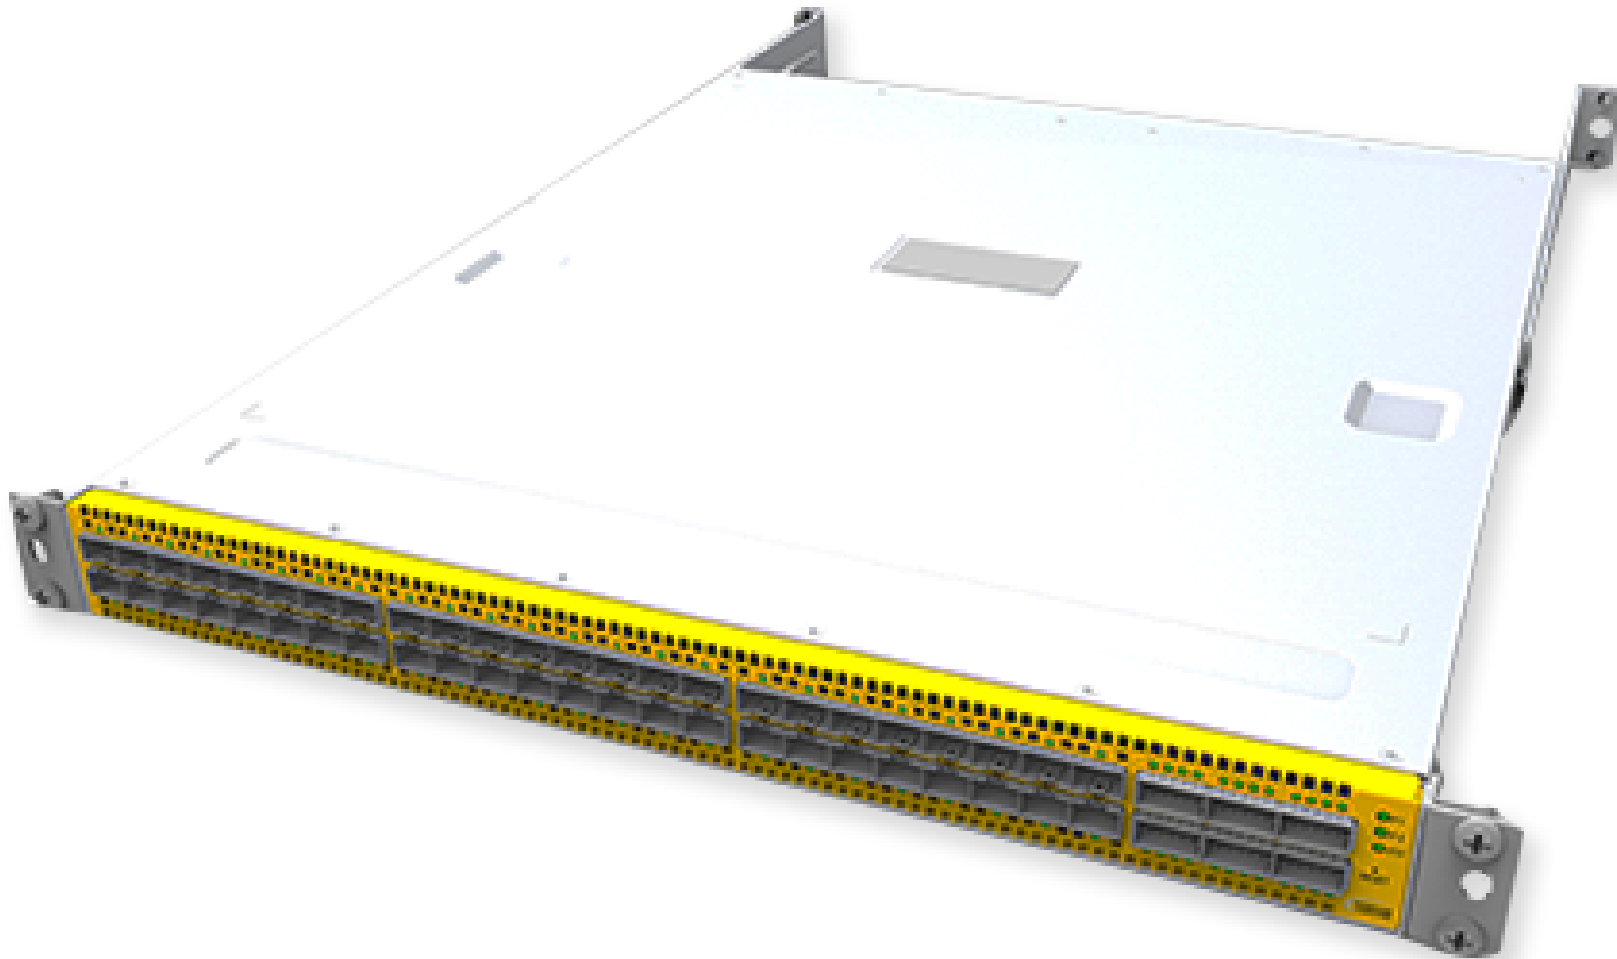

- A self-contained bundle
- Includes dependencies
- Works with interfaces from other snaps
- Can be placed in the store for easy access

Store Story: Erle Robotics

Store Store: Networking

Snappy Ubuntu Core

Open Source software will define what convergence means.

Open Source software will provide the basis of The Internet of Things.

“Together we have the opportunity to bring real technological freedom to every part of the world, across multiple devices and the cloud, and clothed in an elegant, beautiful, experience. It is a bold vision, but our greatest strength in Ubuntu is our community and together we can do this. Come and join us and be a part of bringing Ubuntu to the masses.”

Jono Bacon, former Ubuntu Community Manager
